SUMMARY

13 years of experience in software development, including full-stack web and cloud-based application development (Azure). Hands on software architecture, software design, agile methodologies, coaching and managing developers. Looking forward to keep growing, learning and sharing within a team by designing, planning, implementing testing and monitoring applications using modern software architectural patterns that best fit business requirements.

EXPERIENCE

Senior Software Developer

Petal

 2022 - Present  Montréal, Canada

Working on maintaining, improving and implementing key features for a platform that orchestrates services across Quebec's health care providers. Participating on transforming the company into a world class software provider, modernizing architecture, patterns and best practices, that prioritize modifiability, interoperability and testability attributes.

RoR | Elastic Search | MySQL | Redis | Angular | NgRx |
Typescript | Architectural & Design Patterns | Leadership |

.Net Engineering Manager

Cognizant

 2021 - 2022  Remote

Focused on coaching and helping developers to grow and go to the next level. Participated in projects for one of the big four accounting companies using Microsoft technologies such as .Net Core and Azure, and top notch front-end technologies. Hands on architectural, design patterns and agile methodologies. Designed and implemented a complete career path framework for developers under the .Net umbrella.

Micro-services | Event-Driven Architecture | DDD |
Architectural & Design Patterns | C# .Net | Angular | React |

Lead Software Engineer

AgileThought

 2018 - 2021  Tampa, United States

Worked on a vast project to transform audit experience for one of the big four accounting companies using cloud-based top notch technologies. As part of the core team I got hands on the foundations of the platform, designing solutions and implementing patterns highly tied to the cloud to enforce the usage of abstract software layers by developers to improve efficiency and maintain architectural integrity.

Micro-services | Event-Driven Architecture | DDD |
Architectural & Design Patterns | Azure | C# .Net | Redis |
React | Typescript |

Senior Software Engineer

Unosquare

 2016 - 2018  Guadalajara, Mexico

Worked on several projects for an online bank, focused on delivering ready to market features, and complete applications prioritizing agility, correctness and maintainability. Managed to have an impact on team's development speed, process improvement and communication with client(s).

.Net Core | REST API | JavaScript | Angular | SQL | Scrum |
Azure | Process improvement |

STRENGTHS

- 

Out of the box thinker

I'm always open to consider other options.
- 

Adaptable

Able to work with different technologies, and always open to learn new ones.
- 

Leadership & Coaching

I have experience leading, coaching, and mentoring.

KEY ACHIEVEMENTS

- 

Career Path Framework

Designed and implemented successfully to guide developers through.
- 

Successful in 3

I have had the pleasure to live, work and succeed in 3 countries and different languages.
- 

Vision

I have the ability to find and exploit my team's strengths, by giving them the chance to shine at it.

LANGUAGES

English	Proficient
French	Intermediate
Spanish	Proficient

KEY TECHNOLOGIES

- Backend

- C# .Net Core
 - Ruby on Rails
 - Node.js
- Frontend

- Angular
 - React
 - Vanilla js / jQuery
- Cloud

- Azure
- DBs

- SQL / MySql
 - ElasticSearch
 - Redis

EXPERIENCE

Software Engineer

HCL Enterprise

📅 2015 - 2015 📍 Guadalajara, Mexico

Developed a, from scratch, modern web app to integrate different platforms for mailing, meeting organizers, online chat and more communication capabilities. Made great efforts to enable high tolerance to failures and implement high resiliency in the system following patterns that provide high interoperability.

| C# .Net | REST | JavaScript | Angular | SQL | Agile |

Software Engineer

PriceTravel

📅 2014 - 2015 📍 Cancún, Mexico

Worked on maintaining and adding features to an internal platform of the company. Mostly focused on performance, readability and maintainability of the code, including both front-end and back-end parts.

| C# .Net | REST API | JavaScript | jQuery |

Software Engineer

Gobierno del Estado de Colima

📅 2012 - 2014 📍 Colima, Mexico

Started my journey on web development participating on a large tax administration project. Helped my team to introduce javascript, jQuery and other front-end technologies to the system and assisted junior devs to ramp up.

| C# .Net | REST API | Razor | Entity Framework | LinQ |
| JavaScript | SQL | jQuery |

ARCHITECTURE EXPERTISE

Micro-services
